

ROOT GUARD INGREDIENTS

1. **Capsaicin**: a highly concentrated extract of hot peppers, which has a very pungent aroma. It is soluble in water, **CAUTION** should be used when handling.
2. **Garlic**: has been used as a natural pesticide for many years. It exhibits a non-toxic mode of action, by interfering with the insects ability to detect it's food source.
3. **Humic Acid**: helps to form stable compounds with a number of metallic ions such as iron, zinc, copper and manganese.
4. **Seaweed (Ascophyllum Nodosum)**: soluble in water, it is a natural source of micronutrients and complexing agents.
